Advice sought on

This advice note deals with the rules of the color for the FSC label when the print process uses limited number of colors and provides guidance on following issues:

- under which conditions colors other than defined in FSC-STD-50-001 (V1-1) EN 10.1 and 10.1.2 may be used, and
- which colors to use when the previous conditions are met.

A References

Code	Version	Title
FSC-STD-50-001	1-1	Requirements for use of the FSC trademarks by Certificate Holders

B Terms and definitions in the context of this Advice Note

The terms defined in FSC-STD-50-001 (V1-1) EN apply.

C Advice

Only if the print process does not use the standard colors defined in FSC-STD-50-001 (V1-1) EN clauses 10.1 and 10.1.1, the FSC label may be produced using the darkest available color on a solid non patterned background, provided the contrast allows legibility. The label may be produced in positive or negative versions. The approval of the color shall be at the discretion of the certification body.
